

Education

2016 – 2019 Nanjing University of Aeronautics and Astronautics (NUAA), China

Master of Philosophy, research degree.

- ✧ College of Energy and Power Engineering, Department of Control Engineering.
- ✧ Thesis: Sliding Mode Fault Tolerant Control for Aircraft Engine Fuel System.

2011 – 2015 Nanjing University of Aeronautics and Astronautics (NUAA), China

Bachelor of Engineering

- ✧ College of Energy and Power Engineering.
- ✧ Thesis: Guaranteed Cost Control for a Class of Engine System, a LMI Way.

Languages: Chinese (Native), English

IELTS: 7.5/9.0 (Listening: 7.5/9.0, Reading: 9.0/9.0, Writing: 6.5/9.0, Speaking: 6.0/9.0)

Research Interests

- ✧ Advanced Control Theory (Robust Control, Sliding Mode Control, Optimal Control).
- ✧ Turbine Propulsion System, Quadrotor Control.
- ✧ Machine Learning.

Academic Experiences

1. Collaborative Control of Two Aerial Robotic System.

on-going

- ✧ Control a Parrot Mambo with PD controller, feedback from EKF based on optical flow and IMU.
- ✧ A Parrot Bebop2 is installed with Ardupilot, feedback from motion capture system.
- ✧ The Mambo will follow the Bebop2, collaborative finish assigned task.

2. Control Algorithm Design and Applications for Electric Aircraft Fuel System

09/2017-09/2018

- ✧ Electric aircraft fuel modeling.
- ✧ Control law based on sliding mode control, robust to mismatched uncertainties.
- ✧ Simulation test in MATLAB/Simulink
- ✧ An experimental platform based on Raspberry Pi and STM32, with a UI coded in Python.

3. Fault Tolerant Control for Aircraft Fuel System

01/2016-06/2018

- ✧ A sliding mode observer to estimate the actuator faults in real time.
- ✧ A corresponding fault tolerant control law to compensate it.

4. Research on Aircraft Control System Sensor Fault Diagnosis and Fault Tolerant Control

06/2013-06/2014

- ✧ Built a fault diagnosis system based on BP neural network and Support Vector Machine.
- ✧ Active fault tolerant control strategy is proposed based on Augmented LQR method.

5. Strategy Optimization in Traffic Light Control

03/2013-06/2013

- ✧ Optimized timing strategy of traffic lights to minimize waiting time.
- ✧ Conducted a simulation test coded in C++ to simulate traffic flow on a main road in Nanjing, China.
- ✧ Won the Third Prize in the 7th National University Students Social Practice and Science Contest on Energy Saving & Emission Reduction.

Technical Competencies

- ✧ Calculus, Linear Algebra, Probability, Matrix.
- ✧ Automatic Control, Theory of Linear System, Optimal Control, Digital Control System, Adaptive Control.
- ✧ C, C++, Python, and MATLAB/Simulink.

Awards

- ✧ 2019 Best Student Papers, NUAA
- ✧ 2019 Outstanding Graduate Awards, NUAA
- ✧ 2018 National Scholarship, China
- ✧ 2017 GUOSHENG Student Scholarship, China
- ✧ 2016 - 2018 Scholarship for MPhil, NUAA
- ✧ 2016 Outstanding Freshmen Scholarship, NUAA
- ✧ 2016 Excellent Volunteer, Plan to the West, China
- ✧ 2015 Outstanding Graduate Awards, NUAA
- ✧ 2014 Third Prize in the 7th National University Students Social Practice and Science Contest on Energy Saving & Emission Reduction, China.
- ✧ 2011-2015 Second/Third Prize Scholarship, NUAA

Voluntary Experiences

2015-2016 China Youth Volunteers Program, Plan of University Students Volunteers to the West

- ✧ Serving as voluntary teacher in Tibet for one year.
- ✧ Formed and headed aircraft model team in primary school, motivating students' interests.
- ✧ Contacting with organizations or enterprises, gather more than 15000 dollars donation to local poor area.

Academic Group & Funds

- ✧ Investigator of 2016 Innovation Open Fund for Postgraduate, NUAA
- ✧ IEEE Student Member
